

Comprehensive WIKA services: New brochure provides overview

Klingenberg, May 2024. From situational analysis to calibration: WIKA has comprehensively expanded its range of product-related services. A new brochure offers a concise overview of the globally available services.

They are divided into five interlinked lines of services: analysis and support, installation and commissioning, inspection and testing, maintenance and repair as well as calibration in accredited laboratories and on-site. The services aim to make customers' processes both more efficient and more sustainable. They ensure that downtimes are minimised and the life cycle of the measuring instruments is fully utilised.

WIKA operates service centres worldwide to be able to perform requested services promptly. Maintenance, repair and calibration also cover third-party products.

The service brochure can be downloaded from the wika.com website.
